## The 4 Seasons

Sketchbook Art in Pencil and Watercolor

I have long observed, sketched, and painted the flora and fauna found in my gardens, the fields, and the woods surrounding my home in western Massachusetts. My watercolor paintings attest to this, often depicting a variety of plants and insects that can be found on a walk in a single day.

Recording plants of note over the 4 Seasons will require a year to complete, with 2-4 visits per season. 4 separate paintings, of a to-be-determined size, will portray favorite plants and some fauna, a record to be enjoyed for years.
